Email:	<a href="mailto:ukhighsecurity@gallagher.com">ukhighsecurity@gallagher.com</a>

---

## Specification

There are two additional 1.5m high dropper posts between the fence intermediate posts. Alternate intermediate insulators are to be secured with security bolts.

The height of the Gallagher FT 60 D shall be the height of the host fence plus a minimum of 1.2m acting to form a topping. For example a 3.0m high host fence would require a minimum 4.2m electrified system.

The host fence strength, (including foundations), must be suitable to provide support for a tension-wire system typically strained to a tension of 40kg.
