Specification

? PIDS installation on fence fabric:

A double run of Interceptor sensor cable is installed on the lower and upper Aris rails of the palisade fence fabric using plastic capping, and secured with GQTY-2 UV resistant cable ties spaced at intervals of no more than 500mm.

? PIDS installation in BTC topping:

A single run of Interceptor sensor cable in flexible armoured conduit (FAC) is installed in the BTC topping and secured to the topping using GQTY-1 UV resistant cable ties at every crossover point of the BTC coil.
