National Protective Security Authority

CLD Physical Security Systems

Securus AC

Category: Fences and Gates

Sub Category: Fences

Description

The fence system is made up of a double offset same orientation layer of 4mm Nominal Wire 358 Anti-Climb Rigid Mesh. Fixing the panels to a flanged post at 2.520m centres is completed with security clamps and stainless steel fixings which are repeated across the attack face. This fence system can be upgraded from Securus or downgraded to Securus if the threat level changes. Suitable for either T-Bar or Y-Crank security topping. Available in a Polyester Powder Coated finish to a range of RAL and BS Colours. Also available in Marine Grade Powder Coating.
