

Energetics Technology Ltd

# Halo80 Plus without Accessories - Base Form

**Category:** Litter Bins

## Description

The HALO 80 Plus - Base Form, looks exactly like a standard HALO 80 from the outside, but it is a very different litter bin. It has extensively improved protective performance against higher explosive overpressure and increased protection from high velocity fragments. In Base Form (without accessories), it far outstrips the protective standards of any of our other bins. Main characteristics; exceptional blast mitigation, 360° protection, very low maintenance cost, large litter capacity using standard refuse sacks, does not require permanent fixing to the floor so no installation required.

## Manufacturer

Manufacturer Name:	Energetics Technology Ltd
Post Code:	DE6 5JP
Address Line 1:	Trusley Brook Workshop
Address Line 2:	Trusley, Sutton-on-the- Hill, Ashbourne
