Email: sales@harperchalice.co.uk

Specification

Vibewire Signal Analyser

The SA2000 analyser processes audible signals and vibrations detected by the Vibewire detection cable generated when a vehicle passes over the speed hump. The system sensitivity is set up to allow detection of vehicles at speeds in excess of 10mph but not detecting pedestrians crossing the same strips.

Vibewire

Microphonic detection cable, VibeWire, manufactured by Harper Chalice

Ramp

Cable Protection Ramp (Speed Hump).
