The actions you take immediately following a Chemical, Biological or Radiological (CBR) incident can significantly improve the outcome for all people on the site.

Fold guide

Recognise

the indicators of a CBR attack

Assess

the incident to inform an appropriate response strategy

Do not put yourself or others in danger to assess the incident.

React

appropriately to reduce the harm to yourself and others

Recognise Assess

Physical symptoms

Disorientation and sweating

Twitching and convulsions

Airway irritation and breathing

Eye and skin irritation

Nausea and vomiting

Signs

Two or more people incapacitated for no explainable reason

Unexplained liquids, powders or vapours

Unexplained smells or tastes

Unusual and/or unattended materials, devices or equipment

Any one of these may be indicators of a CBR incident. Multiple indicators may increase the likelihood that an incident is CBR-related.

Where are CBR indicators present?

To avoid moving people on the site through affected routes.

Where are casualties located?

To identify who is exposed and advise Emergency Services.

Where are other people on the site located?

To identify who isn't exposed and nearby routes for evacuation.

Which routes are unaffected?

To identify unaffected routes for evacuation of people on the site.

Are there any obvious secondary threats?

To reduce the risk of a further non-CBR attack.

If there are significant external hazards consider moving occupants to a safe internal location.

React

Communicate

...with emergency services as soon as possible, and say what you see

...with people on the site to move them to an **unaffected** location via unaffected routes

...REMOVE, REMOVE, **REMOVE** to all those affected

Act

...to prevent all but essential access to **affected** locations

...to keep potentially exposed individuals in an unaffected location, separate from those unexposed

...on planned processes to modify building functions e.g. lifts and HVAC systems if appropriate

Do not put yourself or others in danger to assess the incident.
